

# Your Checklist for Choosing An Electronic Logging Device

A compliant ELD should automatically record:

- Engine hours
- Date, time and geographic location
- Motor carrier identification data
- Vehicle miles
- Vehicle identification data
- Driver identification data

Your ELD should also:

- Ensure ELD records are obtained on-demand
- Retain data for 7 days
- Retain data for current period
- Record driving time automatically
- Synchronize with the engine control module
- Have separate manager and driver accounts
- Necessitate that drivers review records of unidentified drivers
- Prevent device tampering
- Have electronic data transfer supported
- Have data for authorized safety officials displayed on-demand
- Have driver annotations for edited records
- Provide user manual
